

DEVELOPING COUNTRIES CORNER

A LITERARY CAFE IN YAOUNDE' - Cameroun

Maria Cristina Lavagnolo, Silvia Failli
University of Padova

In 2015, the University of Padua, specifically the Environmental Engineering research group, developed a bottom up cultural project in Yaoundé, Cameroon, to raise awareness in environmental topics, particularly solid waste management, involving local people of different cultural levels.

The background

Yaoundé counts more than 4.000.000 inhabitants with a rate of population growth in the range of 7-10%. Nearly 80% of the urban population lives in informal settlements occupying 72% of the urban space. 46% of the population has no access to improved water sources and uses latrines as wastewater devices, mainly located close to water wells (UN-Habitat, 2015). The weekly production of municipal waste in the town has been calculated in about 1200 t.

Figure 1. Waste in Yaoundé: a) in a poor neighborhood; b) along a main road in town

Less than 50% of waste produced is collected by the commissioned company HYSACAM, and only along the main roads, while in the poor neighborhood (shanty towns) the wastes are abandoned on the road or in water channels and often burned in the open air (Figure 1). No formal recycling is planned and only 5% of waste is informally recycled by private citizens. Awareness of the people with regard to environmental and health issues linked to wastewater and solid waste management should be urgently improved, although no educational material is available, particularly for the unschooled people.

Within this framework, a decision was reached to design a venue open to the public of all ages and levels of education, where they can find more or less detailed information (video, books, journals, etc.) relating to environmental issues, can connect to the internet to browse international related platforms, and in which seminars on specific topics can be organized to encourage debate and raise awareness.

Specific aims

To meet the main objective, the project has been designed to include a series of specific aims, based on the model of the literary cafe, seeking to promote culture particularly on environmental topics. Unlike traditional literary cafés, the venue in Yaoundé likes to welcome common people rather than intellectuals, since the priority is to contribute towards solving the daily problems caused by poor sanitation in town. Local and visiting experts are invited to promote dialogue.

The physical space has been created to host creative interactions and conversations, outreach and training seminars: to organise meetings to facilitate the discussion between groups of people on specific topics; to promote the link between different networks; to support young people or students in improving their knowledge.

The literary café was initially financed by a series of different institutions, but in order to reach the economic sustainability, after a start up phase, the organizers set up a business activities.

Designing the project

The project provides for the realization of an appropriate cultural space in which to collect and boost interest on environmental topics, promoting awareness and disseminating the best practice with regard to daily solid and liquid waste management.

Basing on a preliminary survey, the space should be integrated into the local social context in order to involve the different sections of the population (housewives, schoolchildren, university students, educators, researchers) and organized in such a way as to implement the different levels of awareness. To promote the success of this venture, a local no-profit organization, TAM TAM Mobile (Figure 2), an apolitical company founded in 1997 by the director Simon Pierre Etonga with the specific ethic aims of contributing to environmental protection, has been involved.

Figure 2. The TAM Tam Mobile team, Yaoundé

TAM TAM Mobile organizes informal door-to-door solid waste collection in the poorest neighborhoods where Hysacam is not present, employing approx. 20 young operators, using hand barrows when feasible, since many houses are not accessible. The activity is economically supported by those residents who are willing to pay small amounts for the service (1,5 to 4 euros per month). Waste is collected at home and then disposed in the nearest Hysacam container along the main road: 20000 people are served in 10 different slums and 960 t/y of waste is collected. This practice is combined with an awareness-raising activity addressed to the population and local authorities on the potential risks to man and the environment linked to poor waste management.

The literary cafe

A cultural and convivial space has been designed as a pole of interest for the citizenship, a reference point for educational institutions and a meeting place and debate on environmental issues for the population. The space has been identified within a popular district through the collaboration of TAM TAM Mobile (Figure 3).

Figure 3. Different phases of the literary cafe: the project (courtesy of arch. Rosalba Giani), the restoration works, the realisation

The project was then finalized, obtaining the necessary authorizations, assessing the restoration works and selecting the furniture in such a way that the space created can provide different types of services: bar, restaurant and catering, services that can attract and welcome diversified people and that, after an initial start-up phase, facilitate economic autonomy; consultation of brochures, books and magazines at different levels of in-depth analysis of environmental issues; use of computers equipped with an internet connection in order to carry out research in the relevant sector, consult online journals, join and keep in touch with thematic networks; organization of small events like public meetings to inform, seminars and discussion groups, projections of documentaries and other material relating to environmental issues, laboratory activities of sensitization.

In action

The literary cafe opened at the end of 2015 and is managed by TAM TAM Mobile. From that moment many activities have been carried out (Figure 4) particularly based on:

- *Awareness and information campaigns on environmental issues for all*

Seminars and training on specific topics (municipal garbage, WEEE recycling, computer laboratory); production and distribution of informative material explaining the actions needed to prevent health risks due to poor sanitary conditions due to the huge presence of abandoned waste.

- *Education, training for women and young people in situations of vulnerability*

To meet the most basic needs, laboratories have been set up as awareness campaigns against gender-based violence and to promote women in the business world.

At the end of each event, a technical report is produced and distributed *ex post* to the participants highlighting the principal results obtained during the discussion that follows.

FICHE TECHNIQUE DE RAPPORT

Activité : Exposé sur le thème : *Evaluation des impacts du rejet anarchique des vieilles Moustiquaires Imprégnées à*

Langue Duree d'Action (MILDA) sur l'environnement et proposition de solution.

Lieux : Salle du café littéraire de TAM-TAM Mobile

1. Date : 07 Octobre 2016

2. Cible : Associations, étudiants, chercheurs, journalistes, écoles, toutes personnes intéressées par la thématique gestion des déchets.

3. Objectif général :

- > Présenter les problèmes que posent les vieilles MILDA hors d'usage qu'on retrouve partout dans le bidonville de Nkolbikok à Yaoundé ;
- > Permettre une pré-soutenance à l'étudiant en fin de stage ayant travaillé sur le sujet.

Vieilles Moustiquaires Imprégnées à Langue Duree d'Action abandonnées dans la nature

Programme de l'activité :

Horaires	Intitulés	Responsables
15h-15h30	Arrivée et enregistrement des invités	Secrétariat TAM-TAM Mobile
15h31-15h46	Evaluation des impacts du rejet anarchique des vieilles Moustiquaires Imprégnées à Langue Duree d'Action (MILDA) sur l'environnement et proposition de solution	Par : M. FOUDEKOU AREMIYAHOU le FRANÇ Stagiaire à TAM-TAM Mobile et étudiant en Master 2 à la Faculté d'Agronomie et des Sciences Agricoles / Fibrière des métiers du Bois, de l'Éau et de l'Environnement (FASA/FMBEE)
15h47-16h30	Echanges et remarques	Simon Pierre D. ETOGA
16h31-16h35	Conclusion	Coordonnateur des Programmes TAMTAM Mobile
16h36-16h40	Photo de famille et fin	Secrétariat TAM-TAM Mobile

Figure 4. Event organised in the literary cafe and typical final report used as follow up document

Events 2016-2018

Activity 2016-2018	Targets	Speakers
TRAINING SEMINAR Collection and treatment of garbage	students, volunteers working in the protection of the environment, researchers, journalists, municipal officials, all those interested in climate change and waste management.	Dr. Mbouna Magloire ; Simon Pierre Etoga (TAM TAM M.)
TRAINING SEMINAR How to sustain community projects after the financing phase in the areas of sanitation, hygiene and sanitation: Case of the Participatory Slum Upgrading Program (PPAB) in Nkolbikok in Yaounde VI.	Members of associations that have benefited from PPAB community funds, students, district and bloc leaders, researchers, journalists, all those interested in implementing a community project in the areas of sanitation, hygiene and health.	The institutions: ERA-Cameroun, ACDESOS, GIC SARECA, AJEM,, IFAHD, GIC Auto Emploi, ARZON
TRAINING SEMINAR Household waste management in urban areas: Crossing perspectives on the systems of the Cities of PADOVA in Italy and Yaoundé in Cameroon.	Associations, students, researchers, journalists, schools, all those interested in the theme of waste management.	Prof. Maria Cristina Lavagnolo (Univ. Padova) ; Simon Pierre Etoga (TAM TAM M.)
TRAINING SEMINAR Environmental education system and solid waste valorization in schools: the case of the IFA (Institute of Artistic Training) of Mbalmayo.	Associations, students, researchers, journalists, schools, all those interested in the theme of waste management.	M.me Sato Pion JICA (Japan) ; M. Masatsugu Ishihara JICA (Japan)
TRAINING SEMINAR Evaluation of the impacts of the anarchic rejection of the old Long-Lasting Impregnated Nets Mosquitoes (LLINs) on the environment and proposition of solution.	Associations, students, researchers, journalists, schools, all those interested in the theme of waste management.	M. Foudikou Aremyahou (Faculté d'Agronomie et et Sciences Agricoles, FASA/FMBEE)
TRAINING SEMINAR The protection of children on television: the case of Cameroon	Associations, students, researchers, journalists, schools, anyone interested in television violence	Dr Alex Kotna President of the Association Télé Jeunesse ; Youth /

		Children's Issues and Television Specialist
COMPUTER TRAINING	Young girls, disadvantaged mothers	Dr. Modo Belibi Pascal, Responsible for monitoring waste segregation activities
EDUCATIONAL TALKS organized by the Yaoundé 6 Multifunctional Center for the Promotion of Young People (CMPJ) on the theme 'Women in the changing world of work: 50-50 planet by 2030'	Young girls, members of the associations, members of the CMPJ of Yaounde 6, managers in services at the CMPJ	Mrs Abena Séraphine Chief CMPJ
INFORMATION MEETING waste electrical and electronic equipment (WEEE) and the WEEECAM project	Chiefs of Melen districts 1, 3, 4, 5, 6, 7A, 7B, 9 and Nkolbikok II	SOLIDARITE TECHNOLOGIQUE
WORKING MEETING of the school psychology trainees of the association SOCIAL ACTION	Students, trainees of the association SOCIAL ACTION	Dr. Essouma Eustache, psychologist
